

ForeScout is a leading provider of real-time network security control solutions, enabling people to access corporate network resources where, how and when needed without compromising security.

PROFESSIONAL CONSULTING SERVICES

Newberry's in-house, ForeScout-certified engineers can assist customers through consulting engagements to plan and optimize ForeScout solutions within your business environment. Utilizing ForeScout products such as CounterACT for Network Access Control and ForeScout Mobile Security Module, Newberry can assist your organization in implementing solutions that provide real-time visibility of devices on your network and protect against unauthorized corporate network access.

PURCHASE OF FORESCOUT PRODUCTS

Newberry is an authorized reseller of all ForeScout products to include:

- **CounterACT for Network Access Control:** ForeScout CounterACT for Network Access Control (NAC) is an automated security control platform that lets you see, monitor, and control everything on your network—all devices, all operating systems, all applications, all users. ForeScout CounterACT lets employees, contractors, and guests remain productive on your network while you protect critical network resources and sensitive data. Based on third-generation NAC technologies, ForeScout CounterACT is easy to install because everything is contained within a single appliance or virtual appliance.
- **ForeScout Mobile Security Module:** ForeScout Mobile Security Module runs as an add-on to ForeScout's market-leading NAC platform, ForeScout CounterACT. Together, these two products provide real-time visibility and control of everything on the network—wired and wireless, managed and unmanaged, PCs and handheld devices—and give you special visibility and control over Android and iOS devices. Relative to a full-blown MDM system, ForeScout CounterACT with the ForeScout Mobile Security Module is more affordable, more unified, and provides more real-time visibility of devices.
